Employment History

Intern, MiraCosta College Computer Science Department

SEPTEMBER 2019 — DECEMBER 2019

- Conducted research on culturally sustaining pedagogies to provide better insight on diversified teaching strategies.
- Leveraged technological expertise to create impactful labs, enhancing student engagement and knowledge retention.
- Developed a series of 10 dynamic online modules, utilizing the practices of culturally sustaining pedagogy to foster inclusivity and diversity within the field.
- Collaborated closely with faculty members to infuse student insights into the design of an innovative introductory course.
- Implemented comprehensive test plans, ensuring the functionality and user-friendliness of each module.

Specialist, Apple

SEPTEMBER 2019 — JULY 2021

- Created product solutions to best fit each customers unique situation.
- Communicated with customers across a wide range of technical familiarity and terminology, tailoring explanations to suit their understanding.
- Utilized in-depth knowledge of Apple's ecosystem to explain technical specifications, compatibility, and features, fostering customer trust and satisfaction.
- Collaborated with colleagues to share product knowledge and sales strategies, contributing to a cohesive team environment and collective success.
- Rapidly adapted to new product releases, software updates, and technological advancements, demonstrating a commitment to staying up-to-date with industry trends.

Education

Associate in Arts: Mathematics and Sciences, MiraCosta College

MAY 2019

Relevant courses:

- Intro to Computer Science I&II: Java
- Basic Data Structures/Algorithms
- Computer Architecture & Assembly Language

Leadership Experience

President, MiraCosta College Computer Science Club

JANUARY 2018 — MAY 2018

- Orchestrated and facilitated skill-based workshops, fostering an interactive learning space that nurtured practical expertise.
- Curated engaging discussions centered around meticulously researched themes and events, fostering intellectual growth.
- Educated club members in essential skills, encompassing soldering techniques and Raspberry Pi utilization amongst many others.
- Crafted eye-catching promotional flyers to entice prospective members, contributing to continuous growth and engagement.
- Continued my impact on campus as the VP of the college's Women in Computer Science Club the following academic year.
